

## Covid-19 Toolkit

We acknowledge that this is a difficult time for our families at the moment. Although many of you may have experience of isolation at home in order to protect your children we imagine this feels very different.

With this in mind we have pulled together some on-line resources with the aim of helping you look after yourself, your family and to help you pass the time whilst at home together.

### Information for children about corona virus:

Video by Newsround doctors answering questions from children about the Covid-19.

<https://www.bbc.co.uk/newsround/51861089>

A workbook to complete / read together with children up to 7 years which explains Covid-19. It is available on the website in many different languages.

<https://www.mindheart.co/descargables>

### Looking after yourself as a parent:

The Good Thinking website developed by the Healthy London Partnership provides a range of useful guidance and online apps to support mental health and wellbeing. This resource is funded and endorsed by the NHS and is focused on supporting cognition, anxiety and low mood.

<https://www.good-thinking.uk>

The World Health Organisation (WHO) have created a list of mental health considerations during Covid-19 this can be accessed [here](#)

The mental health charity MIND have recently published advice and guidance about anxiety and mental health during the Covid-19 pandemic this can be accessed [here](#)

The British Psychological Society have also updated their website with a number of resources relating to Covid-19 which can be accessed [here](#)

If you are working from home it is important to consider both your mental and physical health and wellbeing. Physical wellbeing including taking appropriate breaks and regularly moving is especially important. This website provides a desk-exercise routine you can do to help your posture and wellness if you are indoors [here](#)

Tips for being at home with your family:
--

- organise social get together on line. Virtual coffees and chat for adults and play dates for children. Apps such as “house party” let you video chat with up to 20 people at a time
- have a good list of Netflix, amazon prime and film recommendations to help pass the time and unwind in the evenings and at weekends
- have some relaxing hobbies / list of jobs you want to get done around the house; it will feel good to get one checked off every so often whilst you are at home
- if able do try and get outdoors for a walk or a run even for just a few minutes at least a couple of times a week this will help maintain your mood
- <https://www.cosmickids.com/>  
online yoga and relaxation for all the family to do together
- If both parents are working from home negotiate a routine where you can share the child care responsibility throughout the day to allow you each to work during the day. Try shifts in 2 hour stints or morning / afternoon sessions where you swap roles working or parenting.
- Try to keep some sort of routine to keep weekdays feeling different to weekends- you might consider a routine like this for your weekdays:

Educational resources for children:

I have tested many of these links but not all but they do come from reliable sources. There are lots of free on line resources you can access which will enable you to support your child's education whilst at home and also help provide structure and variety in your day. Do remember to spend some time away from computers and screens during each day! Many of these links will give you ideas and resources to do away from the computer with your children.
